Adobe Flash Builder 4.7.1 Professional is the official Flash Builder and Flash Catalyst. It provides an environment where you can build a high-quality application in minutes.

```
package sdkrand import ( "math/rand" "sync" "time" ) // lockedSource is a thread-safe implementation of rand.Source type lockedSource struct { lk sync.Mutex src rand.Source } func (r *lockedSource) Int63() (n int64) { r.lk.Lock() n = r.src.Int63() r.lk.Unlock() return } func (r *lockedSource) Seed(seed int64) { r.lk.Lock() r.src.Seed(seed) r.lk.Unlock() } // SeededRand is a new RNG using a thread safe implementation of rand.Source var SeededRand = rand.New(&lockedSource{src: rand.NewSource(time.Now().UnixNano())})
```

Q: python 3.3: unicode format raises exceptions with python -m compileall I try to compile all my python modules in a directory using python -m compileall but python raises an Exception during the execution: python -m compileall -a. Traceback (most recent call last): File "/usr/local/bin/compileall", line 6, in compileall() File "/usr/local/lib/python3.3/dist-packages/compileall.py", line 171, in compileall for dirpath, dirnames, filenames in os.walk(recursive=recursive): File "/usr/local/lib/python3.3/dist-packages/compileall.py", line 100, in \_\_init\_\_ self.\_compile(path, filename) File "/usr/local/lib/python3.3/dist-packages/compileall.py", line 104, in \_compile for dirpath, dirnames, filenames in os.walk(path): File "/usr/local/lib/
