The Hoi3 patch. run it.. extract TFH exe from the Paradox patch and put it in.This is based on LPI 3.3-8-7 but doesn't contain any test plans. In this post, I will explain what you need to do to use this test plan. 2. Check if you have enough privilege First, you need to have enough privilege to create the SQL Server Agent job. When you click the button, you'll be redirected to Microsoft account. On the left side of the page, it says, "You don't have enough privileges to create this account." Since you have the required privilege for this account, you need to give permission to create the account for the management team. Give ownership to the appropriate group, then click "Add group." Navigate to the "Team" section in the Azure portal. Select the group that you added, and then click "Add user." Select the corresponding user and click "OK." Click the green lock on the left side of the page to confirm the account permissions. 3. Create the SQL Server Agent job Open the job definition file (e.g., C:\Program Files\Microsoft SQL Server\140\DAC 2d92ce491b
