working? The download server is having issues. yokachi, so you want us to download an iso from a server in the USA, with an obviously outdated portuguese mirror on top? nah. then find a mirror nearby. i've downloaded it plenty of times before i'll see what i can find on a mirror yokachi: if you want us to look at your problem, please just provide the raw output of `wget` hello yokachi: the page you are providing appears to be formatted for the old http protocol, so you might need to switch to http or even https i've changed it to https can anybody tell me the difference between the desktop and server edition of 18.04? I mean, why would one install 18.04 server if he can just install the desktop version? I was going to install it to a VPS to run a simple LAMP stack, but I wanted to know if this edition had any significant differences krokos: i think server by default installs with lamp ok krokos, some packages would be install different OerHeks: thanks, I didn't even think about that I thought of it as a clone, basically thanks, again hiho cuppa, for you nace, oerheks, sorry. oops nace, yokachi, what if you run apt update/upgrade to see what 'has been updated'? yokachi: did you run 'apt-key update' in the terminal? yok
