File Shredder is a tool that can securely delete, shred or wipe all the files on your computer. It allows you

to use a single file or directory as the target for shredding all of the files and folders on a hard drive. The secure deletion feature makes the file disappear without leaving a trace. The shredding feature overwrites the file and its contents with random data making the file unrecoverable. It is perfect for removing files that you do not want recovered and documents that you do not want anyone else to see. The program was designed specifically to remove your data quickly and securely, whether you are erasing sensitive information or deleting files that you don't want others to find.
