If you don't have the Windows CE 5.0 Standard Software Development Kit then, you should download it, along with the Visual C++ 2008 runtime and the Device Emulator Kit from the Microsoft Windows CE Software Development Kit download page . The best way to install it is to have Windows CE 5.0 Device Emulator and Device Emulator Kit disk images from the Microsoft Developer Network, along with Windows CE 5.0 Standard SDK and the Windows CE 5.0 Device Emulator Kit for Windows . After installing Windows CE 5.0, you'll have to configure the OS image by using the Microsoft CE Software Development Kit and Device Emulator Kit, as explained in the installation guide. With these tools, you can burn the CE 5.0 image to the ATA2 Compact Flash card. To do this, you'll have to perform the following steps: Step 1. Go to Start > All Programs > Microsoft CE Software Development Kit > Microsoft CE Software Development Kit Setup Program. Step 2. Click Next, then click Finish. Step 3. Click Next. Step 4. Click Next. Step 5. Under "Target Device," click Choose, then click OK. Step 6. Click Setup. Step 7. Click Install Microsoft CE Software Development Kit. Step 8. Click Browse, then browse to the location of the CE 5.0 SDK images. Step 9. Click OK. Step 10. The software will start downloading the CE SDK images. Step 11. When it is finished, click Next. Step 12. Select the Compact Flash card, then click Next. Step 13. Click Next, then click Finish. Step 14. Click Start. Step 15. The software will install the components on the Compact Flash card. Step 16. When the setup is complete, click Next, then click Finish. Step 17. Click the CD icon, then click Open. Step 18. Click Close. Step 19. Click Done. Step 20. Click OK. Step 21. Click Finish. Step 22. Click Next, then click Finish. Step 23. Click Next, then click Finish. Step 24. Click Yes. Step 25. 2d92ce491b
