Category:Compositing software Category:Post-production Category:Discontinued Adobe softwareQ: How do I limit the max size of a file in GCP? I am working with GCP and I have managed to generate a bucket with large files but I want to limit the max file size to 100gb. Is it possible to set a size limit in GCP or is it better to use external services such as Amazon? A: You can do that from GCS UI, by going to Settings > Shared with you > Files Here you can configure many settings about your files such as Owner (you can set to anonymous) File Size (you can limit to 100 GB) Container size (you can set to 100 GB) This setting is stored in your GCS account, so you have to use the "Edit" button on the top right to edit them. Use of recombinant interleukin-2 after autologous stem cell transplantation in patients with advanced Hodgkin's disease. The use of recombinant interleukin-2 (IL-2) has previously been reported in the treatment of Hodgkin's disease (HD) patients. The purpose of this study was to determine the efficacy and toxicity of this treatment in patients with advanced stage HD. Eleven patients with advanced HD (eight women and three men) were treated with recombinant 2d92ce491b
