PEGylation is widely used to prolong the circulation time of liposomes and prevent premature clearance of encapsulated drugs from the circulation. The long-term fate of PEGylated liposomes has been studied with radiolabeled liposomes, using chromatographic techniques to separate intact from degradation fragments of liposomes. In this paper, the turnover of radioactivity is compared with a theoretical model. The experimental data, obtained from an extracorporeal perfusion of PEGylated liposomes in rabbit and from rats, are summarized, and possible mechanisms for the clearance are discussed. The concept of a hypothetical central compartment that mediates transfer from the liver to the spleen has been developed. The theoretical model describes the turnover of liposomes in the central compartment, and predicts clearance of the intact liposomes and release of degradation fragments into the peripheral circulation. The experiments confirm the validity of the theoretical model. Raja Meghnath (1991 film) Raja Meghnath (literally King Meghnath) is a 1991 Indian Bollywood film directed by Om Bapna and produced by Jagdish Raj Kapoor and Amrit Raj Kapoor. It stars Jeetendra, Aarti Chabria, Sharada, Jackie Shroff, Rati Agnihotri, Kader Khan and Dalip Tahil. Plot Meghnath (Jeetendra), a king of a kingdom, has an only child daughter named Ruksana (Sharada). However, the kingdom is invaded by a tyrant, and the king is killed. The tyrant makes his daughter become a dancer and also his wife. Ruksana is given to a rich Zamindar to get married. The Zamindar, however, also wants to marry his daughter to a Raja. Ruksana does not want to marry the Zamindar's daughter, as she does not like her. She says that she will marry the Raja who has been kidnapped in the city. To save Ruksana, the Zamindar is forced to kill his daughter, though his son-in-law is made a scapegoat. The dead Ruks 2d92ce491b
