latest version of CPLEX and newest The Problem with Logic There is no problem with the software or installation.. The problem is with Logic, Logic is unable to pick up the Audio Unit interface. HACK Logic Audio Platinum 5.5 for Mac OSX I have created a set of HACK setups for Logic Audio 5.5, which allow it to pick up the Audio Unit interface from one of the Emagic Logics. Apr 27, 2016 I am running Logic Audio Platinum 5.5 on a pc.. bother to create drivers for Logic 5.5 as EMAGIC don't want to update Logic for PC users anymore. Oct 6, 2009 I have tried loads of configurations over the years for my G5 iMac, and it is Logic 7.5.5, but the MIDI messaging over TCP/IP is broken, and G5 Power Mac has given up on MIDI completely. I have a G5 iMac with a Soundtrack Card: Soundtrack Live 96.0 (OEM). It has Logic 7.5.5, and it is great. I also have an iMac with Logic 5.5.0, it is great too, and not MIDI limited. What did I do? I simply did the following: When the installer was complete, it replaced the old. Oct 16, 2012 I am running Logic Platinum 5.5.1 on a pc.. bother to create drivers for Logic 5.5 as EMAGIC don't want to update Logic for PC users anymore.
