Chamberlain's Symptoms and Signs in Clinical Medicine 13th Edition PDF.pdf
Chamberlain's Symptoms and Signs in Clinical Medicine.pdfQ: Using new object in javascript functions I have a javascript class: Class.js class Container { constructor() { this.tables = {} this.users = {} } connect(uri) { return new Promise((resolve, reject) => { const client = new Client(uri, this.headers, this.responseType) client.on('request', request => { if (request.method !== 'GET') { throw new Error('Bad request') } if (request.headers.has('Authorization')) { request.headers.delete('Authorization') } request.headers.set('Authorization', `Bearer \${process.env.BTO_TOKEN}`) }) client.on('data', response => { resolve(response.json()) }) client.on('end', () => { resolve() }) client.on('error', error => { reject(error.message) }) }) } } export default Container And the request method from it: Request.js request({ method: 'get', uri: uri, data: data }, (err, res, body) => { if (err) { reject(err.message) } else { console.log(res.statusCode, body) } }) However, I want to use the class Container in Request method. I've tried something like this: request({ method:
