Creative Copies Creative Copies is the name of a feature that is compatible with DaVinci Resolve and Adobe Audition, and is the only alternative of DaVinci Resolve, one of the most powerful professional video editing tools in the world, the purpose of which is to merge two or more separate video sources with or without effect as the input. The key features of Creative Copies are listed below: Source video import and export options: capture your own footage from any digital camera or external device and import it directly to Creative Copies, or export and share to online services, such as YouTube, Facebook, etc. Manage the metadata of your files: use data entry boxes to access any metadata you need, for example, your date and location for each clip or the type of lens you used to shoot. Add and remove clips: quickly, easily and without having to export to a separate project to cut, insert or merge clips, you can add, remove or transpose clips on the fly without the need to add, erase or remove frames. Export to more than one format: transcodes your video to a wide range of formats, such as M4V, MP4, MOV, etc. Export to DVD: create an output file suitable for DVD burning, and burn them with the highest quality possible. Playback and apply multiple effects to your videos: play your videos, add various effects like zoom, pan, crop, equalize, etc. and apply the effects to your entire project. Import and export graphics: insert graphics from your 2d92ce491b
