LJ Reminder Crack Free Download

LJ Reminder Serial Key is a small software application developed specifically for helping you set up reminders in order to remember important meetings, deadlines, or other types of events. Minimalist design After a fast and simple installation process where you only need to press on a few buttons in order to complete the task, you are welcomed by a small icon. The icon represents the key to the program's functions and can be placed anywhere on the screen using drag-and-drop actions. What's more, you can access the tool's configuration settings by right-clicking the icon and set up new reminders by double-clicking the icon. You can also find the utility running quietly in the system tray without disturbing you. Set up new alarms LJ Reminder gives you the possibility to configure a new alarm by providing information about a custom text message, specifying the date with the aid of a built-in calendar, as well as entering the time (in hours, minutes, and seconds). What's more, you are allowed to tweak reminder intervals in hours and minutes, test the alarms in order to view how they behave before activating them, and build up a list with multiple alarms which can be removed or edited. When an alarm is triggered, a small popup notification is displayed on your screen. General configuration settings enable you to hide the icon from the desktop and keep the tool only in the system tray, hide the application from the system tray, and run the program at Windows startup. Tests have pointed out that LJ Reminder carries out a task quickly and without errors. It does not eat up a lot of CPU and memory resources so the overall performance of the system is not hampered. Final observations To sum things up, LJ Reminder makes it easier for you to set up multiple alarms with user-defined text messages, and can be configured by rookies and professionals alike. Suggestions: I've noticed a lot of angry users commenting on a known app (Review button) that is in apple's app store. Most of them, but not all, are complaining about not being able to uninstall the app. However, few of them have really tried to uninstall it. I've become a little curious, I want to know: Is it possible to uninstall an app, that is the app you've installed with review button in it?
