What's New in the?

Incorporate feedback from paper or PDFs into your drawings directly from the Command Line. Incorporate paper or PDFs directly into your drawings in one step, without additional drawing steps. (video: 1:29 min.) Create and share your own template folders. These folders can be used to import or export paper. If you're using previous versions of AutoCAD or a previous release of AutoCAD LT, go to Help | Document Templates to learn more. Receive more feedback from others about your drawings. Add comments or review questions to your drawings. You can also automatically send comments back to the person who sent them to you. (video: 1:19 min.) Create a draft drawing from one of your current files using templates. Share your current work with your coworkers using templates, without duplicating the original drawing. (video: 1:14 min.) Schedule upcoming drawing sessions and receive updates about what's coming up in the new release. (video: 1:24 min.) System requirements: Windows 10 or Windows 8.1 MacOS 10.11 or newer (MacOS 10.10 or newer for the Mac version) Autodesk Account required. Check out AutoCAD subscription options. Compatibility information Editors' note: AutoCAD 2023 is a free update for existing AutoCAD LT and AutoCAD users. Read our FAQ about compatibility. From just a one-click mark, plus a few simple commands, you can have a persistent, three-dimensional paper footprint. There are several ways to quickly and accurately capture two-dimensional paper or PDF documents as a 3D mark, but it's not possible to create a 3D mark from a paper footprint that you create from an external application. The same is true for a 3D mark from a PDF, but it can be done if you are on a Mac. Today I want to walk you through a simple workaround using a program called Base. That's how I create my 3D marks from paper, and it is how I create my 3D marks from paper when using a Mac. Using Base, you can do the following: Create paper footprints Create paper marks from paper footprints Create paper marks from PDF documents Create paper marks from PDF documents when you are on a Mac
