What's New In?

Accelerate your work with a new simple interface and new powerful tools. Manage and apply updates to your custom settings and preferences across multiple drawings, without needing to remember to make changes in each individual drawing. (video: 1:14 min.) New tips and techniques, including improved history, guides, and Live Trace. Simplified settings for using the Live Trace tool. The integration of the new Metafile Export, Memory Refresh, and Direct Database to Database tools make this AutoCAD a more efficient, smarter tool. Changes to layers and export options for 3D and FDM objects. Updated Setups and Print Output options. New DWG Viewer software can be downloaded from the Autodesk website. New CNC Support: Ribbons and XML markup now export to popular industry-standard formats such as STL, OBJ, VDB, PLY, VHC, and J3D. Changes to the File Template editor to make the process of creating a new template easier. New Layers: Create named layers for mesh work and then modify their properties. New Work Paths: Synchronize the work path in 3D drawings with 2D drawings, importing from DWF, PDF, and DWG files. Improved Navigation: Find and link parts, drawing features, layers, and drawings with new faster tools, including: A new Quick Find command to open a drawing with a specific text string. (video: 1:17 min.) Linked command sets: A new Linked command set simplifies managing similar tools, and the new Linked Command Sets toolset manages related commands. New Drafting Tools: Draft Fix, Drawing Shapes, and Define Shape commands let you maintain and expand your ability to create and edit a work path. Improvements to the command line's command history and screen-editing history: The command history now remembers commands you type during an edit session, and the screen-editing history saves and restores the previous editing context. (video: 1:16 min.) Convert any file, including vector-based images, to a DWF file: Convert files to DWF files using the new DrawDWF command. Update Web Help to support new features. If you're using AutoCAD Architecture,
