What's New In Avast AntiTrack Premium?

Scan, detect, block and remove tracking software installed on your computer, including Malware, Adware, Spyware, PUP and much more. It's also possible to block ads by hiding your browser or software's characteristics. You can also spy on others (find out their IP address) and manage tracking status (notification), as well as view, edit and export log files. Avast AntiTrack Premium is a powerful tool for users who want to stay anonymous while browsing the web. It can also be used to block ads.

LockDown is a next-generation anti-malware solution for Windows operating systems. It uses advanced machine learning techniques and latest behavioral detection engine to provide the most advanced security available today. LockDown uses complex feature learning, by capturing the features of each threat group, and can be customized to protect specific user groups and entities. LockDown has been designed to work in conjunction with standard anti-malware tools, providing comprehensive protection for the most demanding users. LockDown's user interface is simple to use and only requires minor configuration, without the need to have a technical background.

SmartCam Monitor is a screen video recorder that allows you to record your desktop and other monitors on your computer at up to 30 frames per second. It can record in the Windows Recorder format (.wma,.wmv,.mp4,.flv, etc.) or as a video file (.mp4,.avi,.wmv, etc.). SmartCam Monitor lets you see, if necessary, the whole recording screen on your computer, even if the computer is turned off. This means you can run the program, if you decide to take a video while you are offline, and you can access the recorded video even if the computer is turned off. You can also protect your recorded videos by password. SmartCam Monitor is an application that is highly recommended to every user of your computer. You will be able to protect your PC from hackers or spyware if you are not able to watch over your PC while it is offline.

SmartCam Monitor Features:

1. Recording in the Windows Recorder format (.wma,.wmv,.mp4,.flv, etc.).
2. Capturing the whole desktop area, even if the computer is turned off.
3. Capturing with a resolution of up to 1080x1920 pixels.
4. Capturing in SD, HD and UHD (Ultra HD) resolutions.
5. Capturing in progressive, interlaced and interlaced frame rates (from 30 to 30,000 fps).
6. Capturing as a video file (.mp4,.avi,.wmv,.divx, etc.).
7. Support of high quality screen recording with continuous recording (a feature not available in other screen video recording applications).
8. Support of recording in different
