AutoCAD LT is a younger version of AutoCAD. It was first released in 1994 as a Windows and Macintosh cross-platform (i.e. operating system independent) CAD. LT contains the core features of AutoCAD and can be used for both drafting and design work. With AutoCAD LT, users can combine their design and drafting experience into a single platform. The first version of AutoCAD, AutoCAD 2.0, was introduced in April 1994 and was the first version to run on the Windows platform. It was also the first version to run on Mac, Unix and IBM PC/DOS platforms. In 1997, AutoCAD 3.0 was released, and it was the first version to support 64-bit operating systems. In 1999, the development of AutoCAD was transferred from the United States to Denmark. In 2001, the source code for AutoCAD 2.5 was made publicly available on the Internet, and AutoCAD LT for Mac was first released. AutoCAD LT for Windows was first released in 2002, and in the same year, AutoCAD 2.5 was officially released. Description AutoCAD LT is cross-platform, meaning it can be run on both Windows and Macintosh computers. It is also a Windows-only program. When AutoCAD LT was first released in 1994, its graphical user interface (GUI) was slower and less responsive than that of AutoCAD. AutoCAD LT features an interface similar to that of AutoCAD, with a number of differences, including: a flat toolbar similar to that of AutoCAD and 3D Modeling for AutoCAD; a ribbon interface; and the menu system is similar to that of AutoCAD. The work that a user performs in AutoCAD LT is similar to that of AutoCAD. You can also perform the same work in AutoCAD. Open any AutoCAD model or project. To create a new model or project, choose a template from the Template Manager. To work on a project, right-click on any of the images in the project and choose View. You can also choose View from the menu bar on the left side of the screen. Drawing files may be stored in either paper form or in electronic form. The latest version of AutoCAD LT supports the following file types: • DXF (*.dxf)

RALEIGH, N.C. — A little boy was killed Tuesday after he was struck by a vehicle and dragged at least 20 feet in his family's driveway in Raleigh, authorities said. Raleigh police were called to the 800 block of Holmes Road about 11 a.m. and found the boy injured on the driveway of a home. The boy was airlifted to a hospital, where he was pronounced dead, according to police. Cameras at the scene captured a harrowing scene. An unidentified neighbor told FOX 8 the child was playing with his cousins in the front yard. He said a child ran into the street and was struck by a car, and the vehicle dragged the boy at least 20 feet before coming to a stop in the driveway. Police have not said how fast the car was traveling. "It was a pretty devastating thing for me to see," said neighbor Lynn Yates, who didn't know the boy. Raleigh police are investigating, and no arrests have been made. Anyone with information about the accident is asked to contact Crimestoppers at 919-834-HELP.
