Hosting options AutoCAD and AutoCAD LT can be run on Windows, macOS, and UNIX-based systems such as Linux, UNIX and the Mac OS. It is also available for the Raspberry Pi. AutoCAD is also available on iOS and Android devices and in a web browser via App.AutoCAD.com. There is also AutoCAD Viewer (not Autodesk Viewer) which can be used for the Mac and Windows (Mac OS 9 or later) with QuickDraw which allows a user to design and draw. Multiple solutions A family of online CAD software applications are offered via the Autodesk Application Store. These include AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D, AutoCAD MEP, AutoCAD Plants, AutoCAD Space, AutoCAD Utilities, AutoCAD WS, and AutoCAD 360. They are based on AutoCAD LT and can be operated within a web browser. The integrated User Guide does not allow a user to create drawing or documentation. AutoCAD STORE runs as a web service on Windows or macOS. It communicates with an installation of AutoCAD LT via one or more of the AutoCAD LT programming languages. The UI for AutoCAD STORE was designed by Ray Zahab, one of the Autodesk Senior Designers. Version history The following are the major versions: 2017 Release. Added ability to set freehand drawing layer offsets and location. New option to split drawing objects into sub-drawings (e.g. to separate drape and hanging modeling objects from a standard drawing). Added a new context menu for editing selections, paths, and splines that contains options for the previously used drawing tools and allows to restrict the selection to other editing modes. New and improved materials, textures and shadows. Geometry snapping improvements. Single rotation and scale functions. New add-on for AutoCAD Architecture. New preview-based, automatic change notifications and a new mode to export to PDF and HTML. 2016 Release. Added a system-level command line autocompletion tool. Q: How to find the relationship between the initial value of a moving average and its variance? I am struggling to understand the formula for variance of a moving average of a random variable  $\text{Var}[X] = E[(X - \bar{X})^2] = E[(X - \bar{X})^2] - (E[X - \bar{X}])^2$  I understand the formula for the variance of a moving average of  $X$  is:  $\text{Var}[Y] = \text{Var}[Y] + \bar{Y} - (E[Y])^2$  And the variance of  $Y$  is  $\text{Var}[Y] = E[Y^2] - E[Y]^2$  But I don't understand why the variance is just shifted and changed in its value. Can someone explain why? A: You want to find the variance of a moving average of a random variable  $\begin{aligned} E[(X_t - \overline{X})^2] &= E[(X_t - \overline{X})^2] \\ &= E[(X_t - \overline{X})^2] - 2E[(X_t - \overline{X})] \end{aligned}$  where the second equality follows from  $E[(\overline{X})] = \overline{X}$ . Then  $\begin{aligned} E[(X_t - \overline{X})^2] &= E[(X_t - \overline{X})^2] + E[(X_t - \overline{X})^2] - 2E[(X_t - \overline{X})] \end{aligned}$
