

[Download](#)

Hello, I got the RAM Disk and I got the license code. After downloading the latest trial version from your site and installing I don't get the license code to register it, how should I do this ... I tried to register it through my browser and email, but nothing happens. What can I do to register the code ... I read that booting from another Linux distribution (KDE, Ubuntu, ...) also doesn't register. Can I be sure that I will get it if I download it from a distribution other than Ubuntu.
