
Smartboard Calculator For Windows 8

Smartboard Calculator is an intuitive and easy to understand piece of software developed specifically for devices using for Windows 8 as an operating system, its main function being to help you solve various mathematical problems in a fun, old-school environment. Clean and straightforward user interface The application is quite simple to work with, its main window mimicking the look of the classical blackboard, yet allowing you to type the equations you wish to solve. Smartboard Calculator displays a virtual keyboard, which you can use to input the numbers you want to work with, while the 'F(X)', 'Unit' and 'S(Ref)' buttons enable you to access more advanced features. Effortlessly perform calculations, draw grids or create shopping lists The program is capable of performing all the simple mathematical operations, such as addition, subtraction, multiplication or division, displaying the results of each one on the spot. At the same time, Smartboard Calculator lets you work with 'Constants', 'Geometry', 'Trigonometry', 'Statistics' or 'Algebra', depending on your particular needs. Moreover, the 'Unit' button allows you use 'Area', 'Science', 'Time', 'Velocity', 'Temperature', 'Volume', 'Angle', 'Weight', 'Pressure', 'Power', 'Force' and many other measurement units. The 'S(Ref)' button enables you to view your activity history and save your work to XLSX files or review your 'Favorites'. Similarly, you can use the provided templates and adapt them to your own purposes. Smartboard Calculator is also able to help you create grids and tables, which you can use for shopping lists or other ends, letting you to write down the items, their amount, and other relevant information. A handy equation solver with an old-school appearance To conclude, Smartboard Calculator is an effective and reliable utility that can successfully assist you in performing simple as well as more complex mathematical operations on your Windows 8 device, with a minimal level of effort on your part. The small sample of works that are available for the software include: * Subtraction, Addition, Multiply, Divide, Index and Eval

What's New in the Smartboard Calculator For Windows 8?

"Smartboard Calculator for Windows 8" lets you solve the greatest number of the most commonly used mathematical problems by putting things into a variety of contexts. The application lets you quickly and easily solve equations such as $x^2 - 3x + 1$, $1.5 / x$, $100 / 6x$, $x - 2.7x + 24.3$, etc. with the option to round to the nearest hundred or to nearest million. In addition, you can even solve the equations to the exact figure by simply increasing the Precision value in the equation. By simply typing a problem and pressing the Solve button, Smartboard Calculator for Windows 8 will solve the problem for you and display the result as a text value in the bottom right of the screen. You can view the resulting text by moving your cursor over the equation and click the magnifying glass located in the bottom left corner of the equation. Smartboard Calculator for Windows 8 Features: * Solve thousands of the most commonly used equations * Solve equations with a variable or constant to any value * Work with constants, geometry, statistics, algebra, trigonometry, geometry * Data analysis and graphing * Lists, charts, tables and flowcharts * Multithreaded function * Add a variety of context, including physics, algebra, geometry, science, geometry, trigonometry, statistics, mathematics, finance, finance, etc. * Multi-language support for Japanese, Chinese, and Korean * Create and solve grid equations * Solve ascii equations * Works with any Windows 8 device * Create and solve tens of thousands of equations * Create, save and close work-books to XLSX files * Share equations and results with others * Set certain equations to be displayed in dark blue, to make it easier to find * Keep the equations on screen during scrolling * Support Portable Screen Disclaimer: The author is not responsible for any damage that may occur to your device or loss of data. Smartboard Calculator for Windows 8 does not have any intention to infringe any intellectual property rights. Keywords: smartboard, math, equation, solve For those people who constantly need to use scientific and engineering equations, this application has just been released. It's optimized for Windows 8.0.x; this application can also solve some problems using the calculator function in Microsoft Calculator! There are a variety of functions. You can solve the problems that need to be solved by yourself

System Requirements:

Setup: Download the latest version of this plugin. Upgrade the following plugins: Create-a-User-Thread: Version 2.6.3 to 2.6.5 (You will not be able to use the Threads module with this version.) Version 2.6.3 to 2.6.5 (You will not be able to use the Threads module with this version.) Xoops Class: 2.6.3 to 2.6.5 Version 2.6.3 to 2.6.5
