ServerMonitor Lite Crack Download [32|64bit]

ServerMonitor Lite Crack + With License Code Free PC/Windows

The ServerMonitor Lite 2022 Crack Edition is a useful tool for monitoring and configuring Windows Servers. Monitor the free disk space on server drives. You can set the warning threshold in absolute size, or percentage of disk space. Includes reports and auto-configuration. Monitor one or many pages on a web site. Checks for positive cases (text that must be found), negative cases (alerts if error text found) and if the page has changed at all. Response times are checked and recorded, and reports can be generated to understand trends. Checks any specified Windows Event Logs (Application, System, Security plus custom event logs) and executes actions you specify if a source you're interested in adds an event to the log. Tests a connection/device by periodically testing it with a ping. No response or too great a delay triggers actions. Ping response times are recorded in a database for reporting and graphing. You can monitor your mail servers (POP3, SMTP & IMAP) and validate that they are running and accepting incoming connections. Execute your custom written scripts written in the Visual Basic Scripting Edition language. You can use custom or 3rd party ActiveX controls. The script determines whether to trigger actions using your own logic. Other features: Simple to Use: ServerMonitor Lite Free is very easy to use. You can use the ServerMonitor Lite Free to monitor just a few servers at once, or monitor all your servers at once. Deep Configurability: The ServerMonitor Lite Free comes with a large number of configurable settings, so you can monitor just the servers that concern you. You can monitor for changes on every page, or only monitor for changed pages. You can monitor every server and you can monitor only the servers that concern you. You can monitor for errors on every page, for example, or you can monitor specific pages. You can also define server types or filter results by type. Perform Actions: After you've created a monitor you can perform actions on the server. You can stop, restart, restart and stop, restart and test connections and so on. You can stop and start multiple servers with a single command. Receive Alerts: You can automatically trigger actions on the servers you monitor. You can trigger an action if the server does not respond within a certain period of time, if the server shows a specific error, or if the page has changed. Perform Your Own Actions: You can also perform

ServerMonitor Lite Activator Download

Monitor Server Lite for Windows. Monitor Server Lite is a good mix of functionality for important servers at a low price. Popular notification methods are supported so you can find out about the state of your servers if something isn't right. Monitor the free disk space on server drives.
