Unarc.dll Returned An Error Code: -14

Dear Sir or Madam, Can you help me with this error? I really want to have the first unarc game on my system to play it with a friend. Thank you very much for your help. Sincerely. Aug 4, 2019 I am getting an error "unarc.dll returned an error code: -8" and "unarc.dll returned an error code: -11" while installing the first game on my computer. Which is "Deathmatch: Evolution". Is this because of insufficient RAM? I installed it on my computer with 2GB RAM. Please help me. Thank you. Sep 30, 2019 I have an error unarc.dll returned an error code: -11 while installing few apps on my computer, including the first unarc games. Do I need 1 more GB of RAM or more for installing the first unarc game? Please help! Hello, this happened to me when I was trying to install one of the first unarc games on my computer, I have an intel core i5. 2GB RAM. I'm not sure if it's my processor or RAM, do you have any solution for this? Sep 30, 2019 unarc.dll returned an error code: -11 In any case I already have 2GB of RAM, and my computer has an i5 processor, and I already tried the Windows 10 troubleshooting compatibility, so I don't have a solution for this. Jun 19, 2019 unarc.dll returned an error code: -11 I've tried to download the suntip.dll, and it says the file is missing, so I need to download it from some other place. Can you please provide me the link, for me to download? Please help! Jun 19, 2019 unarc.dll returned an error code: -11 I have the same problem as many people mentioned. I've tried all the solutions available on the internet. At first, I've got unarc.dll returned an error code -11 and then tried to install it and got unarc.dll returned an error code -6. Then I've tried with AMD instead of Intel, and just solved the error with no problems (except for that it can only run if I'm using 2 GB of RAM). But since I needed to have more RAM, I still got a solution. Thanks guys. Jun 19, 2019

How to to fix unarc.dll returned an error code -7. If any of the three areas in the error return information are not checked then unarc.dll returned an error code - 7 can occur . ISdone.dll File unarc.dll error code 25 Reboot your PC, attach a new hard drive to the PC and install Windows to the new hard drive. Uninstall any obsolete or unwanted programs that you have installed on your PC. If your PC is still having the problem, run the Windows Update and check if it is downloading any of its files from Microsoft. Try to keep the Internet browsing tools, such as Firefox, Chrome and Edge, and other applications as simple as possible. May 25, 2018 A.DLL error can occur when it is updated, replaced or corrupted. A.DLL can be corrupted due to a virus attack. You should be able to find a.DLL file in the %SystemRoot%\System32 and %SystemRoot%\SysWOW64 folder, and when you run it, make sure you select Run as administrator. The default install location for the ISDone.DLL file is D:\ISDone. Dll\ISDone_Install. Here is how you fix : - Click Start - type mmc in the Search program and file field at the bottom of the Start menu - Press the Enter key on the keyboard - Click the disk drive or drive letter where you installed Windows 10 - right-click Computer and click Properties - Click the System Protection tab - Click Recovery and then click Disable System Protection - Then repeat these steps but this time in the operating system that you are using: - Windows 7 - Windows 8 - Windows 8.1 - Windows 10 - Restart your PC when you are finished.
