Field of the Invention The present invention generally relates to a method of fabricating a monolithic semiconductor device having a capacitor, and more particularly to a method of fabricating a capacitor-embedded mixed-mode IC device by using a SOI (semiconductor on insulator) substrate. 2. Description of the Related Art In recent years, mixed-mode ICs tend to adopt large scale integration (LSI) for better performance. Such an LSI is a combination of a standard CMOS LSI and a high-speed analogue LSI. In recent years, with the development of high integration for high speed digital circuitry, mixed-mode LSI chips have been developed. As the SOI substrate is applied to semic
