RECOM

What's New in the Pholor Express?

The overall look of a company is an important factor when we are discussing its image and branding. You can apply various elements, such as logos, shades of colours, background music and fonts, to make your site or app look stylish. However, you might also want to spice up the visuals of your products or services by adding stylised photos. What if you could blend your photos with a stylish interface? What if you could overlay a stunning background image with an overlay of your product logo? Wouldn't that be cool? With this in mind, Word Searcher provides a template for you to do exactly that. It allows you to create stylish desktops, smart gadgets and app interfaces with a combination of colorful text and attractive pictures. Interface Features: "Word Searcher" helps you to create a professional interface and a stylized desktop or gadget. It supports the following features: “Fit" the images to the right size and position, using CSS. “Font" your images, changing the font size, colour and style. “Background" change the background colour and picture size. “Background" position your photos to the edge or centre of the screen. “Sizes" resize the images and the background, according to the screen size. “Transparency" allow you to use translucent effects on the picture. “Animation" create a smooth transition between the different visual elements. “Artificial Intelligence" enables you to make the software look smart, by adding an intelligent algorithm to your pictures. Other features: “JPG" or “PNG" support, for the image format of your choice. “User-friendly" interface, enabling you to create professional-looking items in a matter of seconds. “Large collection", containing more than 60 ready-to-use items. “Themes", enabling you to change the look of your desktops and gadgets. “Fonts", with the support of more than 100 fonts. “Styles", with many colours and style possibilities. “Completely Free", for unlimited use. “Live preview&rdquo
