Because Photoshop uses layers to edit an image, it's crucial that the image you intend to edit has layers. Some photo-editing programs — including Photoshop Elements — create image files without layers. In these cases, you must convert layers to pixels to manipulate them. In addition to being used by photographers and graphic artists, Adobe's Photoshop is

used by many other types of professionals.

Image editing tools that allow you to combine images into a single image file are among the program's most useful tools for a designer. Web designers and mobile developers use Photoshop's tools to alter logos, create web images, and create images for use in mobile apps. Even companies that don't use Photoshop to create logos create images in the program to go on their own websites or corporate logos. Creative Cloud On January 12, 2012, Adobe launched a new product called Creative Cloud. This new package, which is available for monthly or annual subscriptions, includes the website application Photoshop and Adobe

Lightroom (discussed in the next chapter), the desktop applications Adobe Photoshop Elements, Adobe Photoshop, and Adobe Photoshop Lightroom, Adobe Dreamweaver, the Adobe InDesign page layout program, Adobe Illustrator, and the Adobe Acrobat publishing and document-scanning programs. For a monthly subscription, Creative Cloud works out to \$10 per month or \$100 per year. It's a popular option for photographers, who like the ability to create, edit, and manipulate images on their computers. Adobe Photoshop Express In May 2016, Adobe added another application to its suite. Photoshop Express is a free application for downloading, viewing, and editing images

stored locally on your computer. It features multiple picture-editing tools, including a basic version of Photoshop's Lasso tool, which enables you to draw around an area of an image and automatically create a selection around that area. This is a great tool for sketching out an overall idea of an image before spending hours or days creating it in Photoshop. Along with multiple picture-editing tools, Photoshop Express also has options for cropping, red-eye reduction, and sepia-toning an image. You can also use it to print images directly to a supported printer, adjust the image's brightness and contrast, rotate, or skew the image. You can also use a scanner with it to edit images. Most people don't really take a second look at their clothes when they get home from work or school. But every once in a while, you'll come across a street fashionista who is dressed to impress. These types of people are some of the most sought after interviewers. Dressing for Success How one wears their clothes can change the whole aura around them. If you're confident in your appearance, others around you will immediately perceive that you are enjoying your life. Lookin' good might be the easiest way to get a job, an interview, a date. And if you're thinking about going to law school, dressing nicely

is a must. You want to make a good impression and look polished. Dress for Interviews When it comes to interviewing, looking good is of the utmost importance. People want to hire someone they like. Yet, interviews are not one-on-one conversations. You're standing in front of a group of people. Instead of talking, you need to be listening. Listening can be tricky in a business where a lot of the questions revolve around the candidate's experience. This can be tough, because you're working on your experience while listening to your answers. The top fashionista might have an easier time answering questions because they simply look more presentable. They don't have to

worry about how their clothing is fitting, buttons are matching and their shoes are in place. But remember that even the best dressed person is an interviewee. Their appearance also says something about them. If you're really worried, consider a visit to your local tailor shop or try to find some advice on the Internet. Dressing well for interviews is just one small aspect of a career in law. Having the right mindset is key. You will be in the company of judges, legislators, lawyers, and many more people. Treat all of them with courtesy, and watch your demeanor. Let them know that you're interested in working for them. Words to Live By "Everything can change in an instant, but it takes a lifetime to

change a person.” -John Green Dress for Success There’s a lot to learn from the top fashionistas, but one of the best is their ability to dress for success. However, no one is born with this skill. They have to work on it.

Improving access to patient-centered practice. Patient-centered care is the new norm in medicine. But for some providers, particularly physicians, it remains a challenge. In this article, we consider three approaches to improving access to patient-centered care that might work. First, we consider how we can use the tools at our

disposal to ensure that the patient (and family) is always at the center of the caregiving team. Second, we explore innovative approaches to improve and expand the amount and types of care that patients need from their providers. Third, we examine how we can enhance the skills of those who care for patients, thus improving their ability to care for patients. We also consider how we can help other disciplines to better understand and incorporate the patient's experience of care into their work.
