$59.00 Maya Data Mining RapidMiner RAP Tutorial. A free, step-by-step tutorial to get you up and running with RapidMiner. The tutorial describes the learning curve, and the processes involved in data mining. Requires RapidMiner 5. The tutorial is well laid out with a description of how to use each of the processes that are required in the RapidMiner data mining process. Beginners should be able to pick this up in no time. As it is a free tutorial, it is not complete. It doesn't cover additional commands like 'find outliers', or the use of filter rules and cluster analysis. However, the process of data mining is covered in a very easy to follow manner. If you have previous programming experience, it is worth exploring. RapidMiner, the Most Powerful Data Mining Software on the Market: RapidMiner is the World's Most Powerful Data Mining Software. With RapidMiner, you can analyze and visualize data, build models and make predictive decisions. RapidMiner has over 3,000+ subscribers and 90,000+ users worldwide. RapidMiner can be run on Windows, Linux and Mac. Time series forecasting is the process of predicting future values of a time series based on past observations. The model is then compared against the true observed value to predict the accuracy of the model, and hence the future values. Time series forecasting is more common than ever before and most people have data. Whether they use it for their own purposes, or to sell to others, data is one of the most powerful tools. Unbelievable Data Discovery and Data Visualization with RapidMiner: RapidMiner is the world's most powerful data mining software. With RapidMiner, you can analyze and visualize data, build models and make predictive decisions. RapidMiner has over 3,000+ subscribers and 90,000+ users worldwide. RapidMiner can be run on Windows, Linux and Mac. With RapidMiner, you can analyze and visualize data, build models and make predictive decisions. Get out of your vehicle and into a spotter's seat: Our friend at RapidMiner, Andre Vetter, is the creator of a series of RapidMiner Spotter's Guides and I highly recommend purchasing and viewing these at your own convenience. What I've written is only a small portion of

Version: 1.0 OS: Microsoft Windows 95/98/NT/Me/2000/2003/XP/Vista/Windows 7 License: GNU GPL (public domain) Worked With: I've used this application for quite a few years now and I must admit that it worked great. It was the last program I used before I switched to webbased solutions. It is still a great tool. Regards, Version: 1.0 OS: Microsoft Windows XP License: GNU GPL (public domain) Worked With: Mail Carbon worked great for me when I was using it with my old provider, but with my new provider I'm now using the standard e2s feature called destination matching and it works just as well as using a tool like Mail Carbon. Regards, Version: 1.0 OS: Microsoft Windows 95/98/NT/Me/2000/2003/XP/Vista/
