Characters SE. A natural way to tell you that is by explaining the source. Thanks for your help... 08:35 pm Drakea Cannot post the link as dont have 10k smf 12:26 pm fatalmodus666 Is it possible to play multiplayer on ps3 and xbox? If yes, how? 12:56 am Aldred I need to list out how long the patches have been in there, and how many people have still not installed it. 2:43 am Aldred It's been out for a while already, and it's about 100 or 200 people that have a PC now. 3:03 am Aldred BTW, we usually crash on the debut of the game. I'm going to see if it happens to me or not, so I can report it to the devs. 3:18 am Aldred I can report it, and make sure they're aware of it. I'll do it later. 3:21 am Aldred Please crash when you start the game, and report. We don't want to get our reports lost because of a server crash. 3:51 am Aldred No one else seem to have this problem. So the crash is not too big of a problem as far as I can see. 4:13 am Aldred These are the problems I was able to stumble upon.

My problem is usually when I play. 6:41 am Aldred Just installed SFx

Games have
often offered a
patch, or
official
updates, to fix
bugs, or add
new
features. Force

Inhibition
During New-to-
Training
Exercise: A
Case Study With
Elite Junior
American
Football
Players. The
purpose of this

study was to
determine if an
elevated acute
blood lactate
concentration
after a
prolonged
exercise bout
would prevent
the ability to

perform maximal
strength
contractions,
and if so, if
such a
condition could
be modified
through
neuromuscular
electrical

stimulation
(NMES)
training. The
analysis was
carried out on
the basis that
the acute blood
lactate
concentration
and capacity

for force
production are
compromised
during a new-to-
training
condition.

Eight elite
junior American
football
players

completed 2
NMES-trained
sessions ($2.5 \times$
50 Hz, 0.4 mA)
separated by 7
d. One session
was performed
during recovery
from a 20-km
time trial, and

the other
session was
performed
during recovery
from a 6-km
time trial.

During the
2.5-km time
trial, subjects
ingested the

lactate booster
dose along with
1.2 g of
carbohydrate to
modulate the
blood lactate
concentration.
In addition,
the subjects
were required

to exert
maximal force
in the
concentric
phase of a
bench press
exercise at
150% 1
repetition
maximum for the

highest
possible time
within 30 s.
The results
indicated that
NMES training
resulted in a
40% greater
muscle twitch
force (189 ± 13

N vs 137 ± 11
N, $P = 0.05$)
and a 50%
greater power
output ($13.5 \pm$
 2.9 W/kg vs 8.5
 $3da54e8ca3$
