Corporate governance Autodesk's corporate governance is regulated by the Autodesk Code of Conduct. Industry groupings The major groups in the industry include Autodesk, Bentley, CAE Global, Primesight, Trizent, and Viz3D. Aerospace In the 3D visualization market for aerospace and related industries, CAD/CAM and design software vendors have an advantage over traditional 2D sheet metal manufacturers, because the design is usually pre-visualized by engineers. Many software vendors have provided their customers with software products based on the 3D modeling data generated from those products. Examples include: Acacia – Autodesk – the 2D (sheet metal) and 3D software products for commercial and defense aircraft. ANSYS – industry leaders in engineering software, design and simulation for the aerospace and defense industries. AutoCAD Autodesk AutoCAD is the flagship of the Autodesk family of programs and has been the industry standard for drawing CAD drawings for more than a decade. It is used in fields such as architecture, design, engineering, construction, manufacturing and data visualization. AutoCAD is the most- a1d647c40b
