Select the Flash Card, on which the still image you want to recover was recorded, then click "Start." Recovering files from diskettes To recover files from a floppy diskette, launch the Flash Retriever application and select the "Recover Files" option. Select the floppy diskette, on which the files you want to recover were saved, then click "Start." ---> For more information about Flash Retriever visit the official website at www.ultraretriever.com. For more information about Sanyo/Fischer CompactFlash Media, please visit the following link: To remove file extensions from screenshot please visit the following link: ---> This software does not use any third-party cookies. It is a useful tool for those with damaged flash media, (as long as you know which type you have and if you have data) Works great for videos too if you don't know if you have a tape, or just need to get your memories back. Wonderful product. Every one of my CF cards & mags have been recovered from at least one damaged one. Recovery in just a few minutes. It can only get better with all the memory improvements coming to CF cards. ---> [STEP 3] Specify Location Select the flash media you want to recover from, then click "Start." ---> [STEP 3]

What's New in the?

Flash Retriever is an application with more than 40 years of experience in the recovery of pictures, movies and sounds from flash media. It can recover pictures, movies and sounds from the following media: SmartMedia, Memory Stick, CompactFlash, and all other flash memory cards. We are continually adding features to this most powerful program. This includes the ability to retrieve pictures and videos directly from your camera's memory card, to browse pictures saved on the camera or card. The program is also completely multi-threaded, to speed up the recovery process. Flash Retriever can be used on the PC or Mac as a memory card reader and folder creator. It features a very user friendly graphical interface that will allow you to easily navigate through all the saved files. On top of this you also have the ability to browse through the pictures or find out information about them, such as the filename, date taken, date last accessed or type of file (pictures, videos, audio, etc.). Also included is the ability to view images in their original size, large thumbnail, export images to specific formats or retrieve images from RAW formats. You can also view a graphical timeline of the images, as well as a local timeline for each image. For each image there is also information on the file name, date saved, filename extension, size, name of the movie or video and type of media (SmartMedia, CompactFlash, Memory Stick or xD Picture Card). Like all of our programs, the Flash Retriever Free Edition also has no time limitation and is completely free for personal use. For a limited time, you will also be able to download the Windows version for FREE! Click the following link to download it now!
