## Wallpaper Rotator

Wallpaper Rotator is a freeware program which allows you to create cool animated wallpapers, just with a few easy steps. This Windows application is self-extracting, so there is no need to install it first. After you complete the installation process, just double-click on the .exe file and enjoy a cool and animated wallpaper all day long. You can choose from a wide range of different wallpapers, even if it's too hard to select which one you want by looking at them all. All you have to do is select one or a few, then activate the shortcut to set a favorite. The rest is in the hands of the application. It will loop the selected wallpaper over and over and make it super fun and different. Wallpaper Rotator is a very elegant and user-friendly application, thanks to its easy-to-use interface and its captivating look. A Windows app with no registry Key and no self-extracting archives. The main improvement from version 2 to version 3 is that the application is not running as a Windows service anymore. As a result, we are no more limited to only 4 wallpapers. The secondary improvement is that it now supports Windows 10. If you run Windows 10, you can set it to only display the index when you change the wallpapers. If you have more than 4 wallpapers, it can now tell you to disable this function. The program still supports a quick (but slow) index rotation in case you have a lot of wallpapers. However, there's a new feature that came with the release of version 3: Automatic Wallpaper Replacement. This allows you to choose from one of six different themes and to have the application automatically change the wallpaper when you're at the desktop. Simple installation, easy to use Wallpaper Rotator has a very easy setup wizard. There is no need to download the program first. Just double-click on the setup file and it will install quickly. Let's explain how to use the program: Just double-click on the .exe file and you're ready to enjoy the fantastic graphics. It's like having a DVD player in your computer. To add a new wallpaper, just choose from the "Desktop" or "Search" tab. You can also set the program to only show the index of wallpapers if you have more than 4. The program is easy to navigate and is even more user-friendly than the previous versions.

## What's New In Wallpaper Rotator?

A simple and efficient app, which allows you to rotate a large number of images, with one touch, very easy! Wallpaper Rotator is a small, yet very powerful image rotation tool for the home Windows system. With Wallpaper Rotator you can easily and quickly rotate a very large number of images using your mouse!
