Course Of Popular History Enlarge this image toggle caption British Museum/Roger Viollet/Getty Images British Museum/Roger Viollet/Getty Images In 1959, a year after the Beatles made their first appearance on British television, a 12-year-old named John Peel was given the job of choosing the playlist of the top 40 pop recordings for a radio show called the "Easy Listening Show." "I have a God-given instinct for music," Peel would tell his listeners. The moment when the "gate" that would open the way to the 1960s for British pop music was made was a few minutes into that first broadcast, he said. "At the end of the old number, there's a little ad-libbed jingle: 'And now for the top 40,' and that's when we'd say: 'Well, of course, this was for adults,' and we'd play a couple of classical and jazz records in between each of the pop records. That was our cue, really," Peel told NPR in a 2017 interview. He came across a Japanese graphic designer named Teru Ishii who was, like

him, fascinated by the aesthetics of popular music. Ishii's first work was to produce a graphic for a children's record called Steamboat Willie, produced by Walt Disney. Steamboat Willie, released on March 28, 1928, helped introduce the world to Mickey Mouse. The character had appeared in 1928's animated short Plane Crazy. In that, Mickey was paired with Donald Duck, who could not walk, but could travel through air by the use of steam and the pull of his own gravity. The pairing of Mickey and Donald was, as far as I can tell, the first appearance of the modern-day Disney family. Ishii's graphic was simple but, taken together with the sound of the voices in the cartoon, instantly recognizable. Ishii would go on to create hundreds of images of the Beatles over the years. He photographed the band's first appearance on "The Ed Sullivan Show" in the U.K. in February of 1962. He also took photos of the group posing in front of the London Eye, riding bikes in Liverpool's market square, on the
