BitRecover EMLX Viewer

BitRecover EMLX Viewer is an easy-to-use program that gives you the possibility to open and view EMLX files from Apple Mail on Windows. However, it also works with the regular EML format. This is a portable and free tool that comes in handy if you don't have the Apple Mail client installed to view EML messages, especially since it doesn't require you to set up your mail account. You just have to point to the file and open it. View EMLX files without an email client Although BitRecover EMLX Viewer doesn't require installation, you should know that it creates cache files in the same directory as itself when opening EMLX files. As far as the interface is concerned, the mail tool adopts a clean window with an intuitive structure, where you can get started by opening an EML file or a folder containing multiple emails. The emails are neatly organized in a tree view on the left and can be accessed from the right. In addition to the message, you can view any graphical content, attachments, and header information, such as the sender, receiver, subject and date. Convert EMLX files to EML format If you have to deal with large amounts of text, you can use a built-in search function to look up information across the whole raw messages or only in the shown headers. Search results can be restricted by specifying the start and end date. What's more, you can change the date format and refresh all displayed messages if any modifications were made in the meantime. EMLX files are automatically converted to EML format, so you can simply double-click an entry in the list to open its location in Windows Explorer and view the messages and attachments in EML. Simple EMLX viewer for all types of users We haven't come across any compatibility issues with Windows 10 in our tests. The utility loaded emails quickly and had minimal impact on the computer's performance. Thanks to its clean interface and approachable options, BitRecover EMLX Viewer can be easily used for opening EMLX and EML files to read emails without using mail clients.
