It's a "Same Subject Post Part 2" post. The difference is, I have chosen

to limit myself to just ten. Sam Hyken, Wharton professor at the University of Pennsylvania and a 2013 winner of the Elsevier Entrepreneur of the Year Award (has been hard at work for a number of years preparing a new book, In Doubt: Uncertainty in the Sciences and the Grading of Evidence, This is the first scientific book I have had occasion to read by Hyken. I would like to congratulate him on his exceptional career thus far. It is easy to get the idea that, as scientists, we understand the physical laws of our universe and have a

solid grasp on our own identities. But the evidence that we know what we know and who we are is accumulating. The past year has been the year of behavioral scientists. A conspiracy theorist might well argue that human behavior on the left is nothing more than the cumulative effect of leftist brainwashing and a denial of free will. This would be the view of a sophisticated social scientist—in a liberal arts college. By contrast, the common victim of the putative brainwashing would be an ordinary person and not an

expert. Lynne M. Collins is a social psychologist at the City University of New York's Brooklyn College. In her recent book, *Boldness and Think (or Fuss) Less: Coping with Complexity in Business*, Collins analyzes communication at work. She argues that an appreciation of the complexity of organizational life is essential to understanding workplace dynamics. I used to work for a company that does a lot
