There are many different types of headsets that can be used to communicate, the most prevalent being a pair of earphones worn over the ear, or a pair of earmuffs that cover both ears. The headsets have evolved over time from simple earphones into highly advanced communication systems and are now commonly equipped with features that enable users to communicate using voice, text, images, and a myriad of other types of communication. Further, a variety of headset styles are available to meet a user's

preferences, and these headsets can be fitted to any part of the head, including the neck. A variety of wearable headphones exist in the art for communication such as headsets or headsets with other accessories including communications, video or other audio input, and/or audio output. Headphones typically include a headset unit and a pair of earmuffs having at least one opening for receiving and/or passing sound waves. Headphones include two primary

System Requirements:

Minimum Requirements: Recommended
Requirements: Genki Oyoshi Reina

Furumaya Koharu Utada Genki: What do you think about your current image? Reina: I don't know. My face is probably the most expressive part of myself, but I like how my chest looks a lot more when I smile. I want to be more cheerful and cute like this.

Koharu: I'm actually very surprised that I'm so small
