**What's New in the TestDisk PhotoRec?**

==================================== TestDisk & PhotoRec is the best of the best. It's not only easy to use, but it can also help you rescue lost data from many disk and CD/DVD errors, including empty partitions, bad sectors, FAT errors, MFT errors,... TestDisk can also be used to fix issues with booting, mkfs.fat, mkfs.ext2, mkfs.ext3, mkfs.ext4, mkfs.exFAT, mke2fs, mkfs.vfat, ntfsresize, repair NTFS/FAT/HFS, and many more! PhotoRec is the best of the best. PhotoRec is the easiest and most powerful data recovery utility on the market. It can recover photos and videos taken by digital camera and recorders like DV cameras, phones, and camcorders. PhotoRec can even recover photos and videos from your digital camera when it crashed or suffered a hard-drive failure. It can recover lost files even after a new file system was installed over the partition. TestDisk & PhotoRec supports: ============================= TestDisk and PhotoRec have been written to support numerous disk and file system types. A wide selection of test algorithms allow you to perform a thorough test of your disk to determine the cause of the problem. TestDisk and PhotoRec can list or change the partition table type of a disk, find lost partitions, read and write FAT32 and NTFS partitions, read and write ISO images, read/write ext2/ext3/ext4 file systems, repair bad clusters on exFAT file system, analyze MFT records, repair MFT records, recover lost NTFS, FFS and HPFS/aFS volume structures, undelete files, undelete folders, undelete partitions, repair MFT, recover file names from MFT records, and many more! TestDisk and PhotoRec can also recover individual files deleted from the partition. If the file is in a file system that is supported by the tool, PhotoRec will attempt to recover the file and any of its files and folders. If the file is in a file system not supported by the tool, then PhotoRec will display a list of all the supported file systems. You can then choose which file systems to scan to find the file you want to recover. How to use TestDisk & PhotoRec: ============================= TestDisk & PhotoRec is run by launching a terminal and typing "testdisk" followed by a single space and then "photorec". This will start up TestDisk and then PhotoRec. You can use either the graphical interface or the command line. TestDisk supports more than one device at once and is very multi-threaded. You can launch several instances of TestDisk running in parallel to check all the disks at once. Command Line Interface: ---------------------- If you would prefer a command line interface to

**System Requirements For TestDisk PhotoRec:**

PC : Intel® Core™ i3-2100 or faster : Intel® Core™ i3-2100 or faster CPU : 2.0 GHz or faster : 2.0 GHz or faster RAM : 4GB (8GB recommended) : 4GB (8GB recommended) OS : Windows 8.1 (64-bit) : Windows 8.1 (64-bit) DirectX: Version 11 Region: This is a fully region locked game. Recommended Requirements: PC : Intel® Core™ i
