free version on your computer using the web installer. cyberghost's free version comes with a seven-day money-back guarantee. the company says it will only be able to track your usage within that time, and will not track your activity beyond that point. the company will warn you that this information won't be deleted, and it's clear that this policy is meant to placate concerns about the amount of information it collects. it's not the first vpn company to make this promise -- other providers have gone as far as to say they will delete your data if you ask. but it's worth noting that, unlike other providers, cyberghost doesn't offer a freemium option that would let you use the service for free while also letting the company track your usage. cyberghost free offers a couple limitations, including the fact that it won't let you download torrents or use a range of programs (like google chrome ) or platforms (like ios) for which it doesn't have a client.
