Social Support (SS) is a tool that guides CHWs when using a patient as a peer coach. It includes a 12-item survey that addresses the patient's knowledge, motivations, and barriers to living a lifestyle consistent with the HAP. The survey scores those items on a 4-point Likert scale. It was developed by DiMillo [31], and has been used with poor- and rural-dwelling community-dwelling

older adults to successfully improve health behaviors [32]. University of California San Francisco users may download dissertations using the Dissertations site, accessed via <https://dissertations.library.ucsf.edu>. Links to log in to the site directly below the download button of each thesis or dissertation page. To support readers of my book *Mixing Secrets For The Small Studio*, as well as music-technology students/educators in general, heres a list of multitrack projects which can be freely downloaded for mixing practice purposes. All these projects are presented as ZIP archives containing uncompressed WAV files (24-bit or 16-bit resolution and 44.1kHz sample rate). For maximum mixdown flexibility, the contributors have made every effort to provide audio raw, in other words without additional effects or processing (beyond treatments printed during tracking/editing). When importing the tracks, just make sure all the files start at exactly the same moment in time within your DAWs timeline. (Download problems) In addition to the Full Multitrack packages, there are also many quick-download Edited Excerpt versions (usually featuring the songs biggest chorus) which provide bite-sized mixing assignments well-suited to

classroom use. In both cases a preview mix is provided for easy auditioning while browsing through the list. If you're new to mixing, you can find some beginner-friendly projects on my dedicated Suggestions For Newbies page. If you'd like to search for projects with specific instruments, track counts, download sizes, or Discussion Zone thread counts, then check out the new beta-version library search page.
